

## Environmental Policy Statement

AVANT Innovations Limited commits to attain environmental sustainability. This policy governs our business operations regarding the environmental aspects, with goals to minimize the impact of our operations on the environment and ensure environmental and social considerations are truly integrated into our everyday practices.

The company will consistently strive to promote environmental awareness and sustainability in our business community and at all levels of the company by:

- complying with local and international environmental regulations and standards that are applicable to our business and operations;
- implementing energy saving measures in our office facilities and encouraging efficient and effective use of energy and resources in daily business activities;
- promoting environmental awareness, educating and motivating our employees to carry out their tasks and work activities with an environmentally responsible attitude and practice;
- minimizing our operational waste and practicing waste management based on the "Reduce-Recycle-Reuse" principle;
- encouraging our suppliers and contractors to incorporate environmentally sustainable practices into business collaboration to gain mutual benefits; and
- regularly reviewing and improving our business practices and adopting new technologies that help protecting the environment.
